

AVT

Temperature and Air Velocity Transmitter

thermokon[®]
HOME OF SENSOR TECHNOLOGY

Datasheet

Subject to technical alteration
Issue date: 16.12.2024 · A143

» APPLICATION

Temperature- & Air velocity transmitter for measuring and monitoring air velocities in supply/exhaust air plants, ventilators, regulation flaps and electro damper registers.

» TYPES AVAILABLE

- AVT *Temperature- & Air Velocity Transmitter*
- AVT-D *Temperature- & Air Velocity Transmitter with LC-Display*
- AVT-D-R *Temperature- & Air Velocity Transmitter with LC-Display and Relay*

» SECURITY ADVICE – CAUTION

The installation and assembly of electrical equipment should only be performed by authorized personnel.

The product should only be used for the intended application. Unauthorised modifications are prohibited! The product must not be used in relation with any equipment that in case of a failure may threaten, directly or indirectly, human health or life or result in danger to human beings, animals or assets. Ensure all power is disconnected before installing. Do not connect to live/operating equipment.

CAUTION! Risk of electric shock due to live components within the enclosure, especially devices with mains voltage supply (usually between 90..265 V).

Please comply with

- Local laws, health & safety regulations, technical standards and regulations
- Condition of the device at the time of installation, to ensure safe installation
- This data sheet and installation manual

» PRODUCT TESTING AND CERTIFICATION

Declaration of conformity

The declaration of conformity of the products are available on our website
<https://www.thermokon.de/direct/en-gb/categories/avt>

» NOTES ON DISPOSAL

The crossed-out wheeled bin symbol indicates that the product or removable batteries must not be disposed of with household or commercial waste. Within the EU, you are legally obliged to dispose of the product separately and appropriately in accordance with the national laws of your country. Alternatively, please contact your supplier or Thermokon Sensortechnik GmbH. Further information can be found at: www.thermokon.com

» TECHNICAL DATA

Measuring values	air velocity and temperature	
Medium	air or other non-flammable/non-aggressive gases	
Output voltage	2x 0..10 V min. load 1 k Ω	
Output ampere	2x 4..20 mA max. load 400 Ω	
Output switch contact (optional)	AVT-D-R (LCD relay) relay with change-over contact (volt free contact), 250 VAC 6 A / 30 V= 6 A resistive load	
Power supply	24 V= ($\pm 10\%$) or 24 VAC ($\pm 10\%$) SELV	
Power consumption	max. 2 W AVT-R LCD: max. 2,4 W	
Measuring range temp. (Probe)	AVT 0..+50 $^{\circ}$ C	AVT-D / AVT-D-R default: 0..+50 $^{\circ}$ C (configurable -25..+50 C)
Measuring range velocity	0..2 m/s 0..10 m/s 0..20 m/s selectable at the device	
Accuracy temperature	$\pm 0,5$ K (typ. at 25 $^{\circ}$ C and air velocity > 0,5 m/s)	
Accuracy velocity	0..15..2 m/s: 0,2 m/s + 2% of measuring value* 2..10 m/s: 0,5 m/s + 3% of measuring value* 10..20 m/s: 1,0 m/s + 3% of measuring value*	*typ. at 25 $^{\circ}$ C, Minimum stabilization time 10 min.
Sensor	calorimetric measuring principle	
Display (optional)	LCD 3,5", 46,0 x 14,5 mm optional for indication of measured values	
Enclosure	housing: ABS, cover: PC	
Protection	IP54 according to EN 60529	
Cable entry	M16 for wire max. $\varnothing=8$ mm	AVT-D-R 2x M16
Connection electrical	terminal block, max. 1,5 mm ²	
Probe	stainless steel V2A L=200 mm, $\varnothing=10$ mm	
Ambient condition	Enclosure: 0..+50 $^{\circ}$ C max. 95% rH (non condensing) Probe: -25..50 $^{\circ}$ C	
Delivery contents	incl. mounting flange	
Notes	optional with display "LCD", optional with relay, adjustable Immersion length: 50..180 mm, using mounting flange adjustable switching threshold and hysteresis	

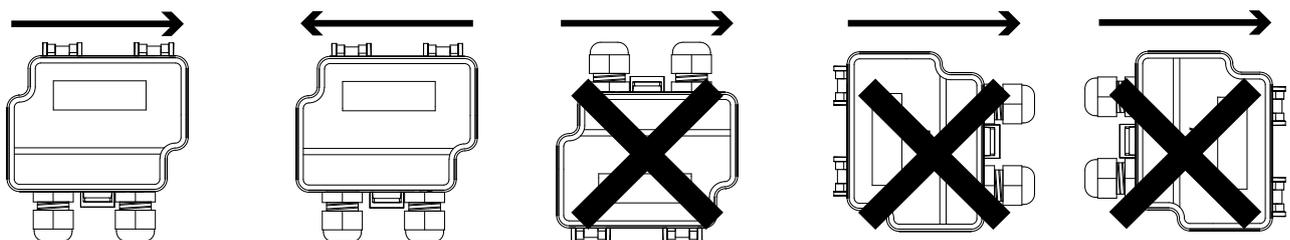

» MOUNTING ADVICES

The supply cable and control cable for relay should be separated, if high voltage (no safety extra-low voltage) is used as relay contact. Both cables have their own cable entries.

The relay settings need to be done before high voltage (no safety extra-low voltage) is connected to the device. This ensures human protection against electrical shock.

A prerequisite for the operation is a proper installation of all electrical supply, control and sensing leads as well as the pressurized connection line.

According to the direction of flow, the installation is to be carried out according to the following illustration:

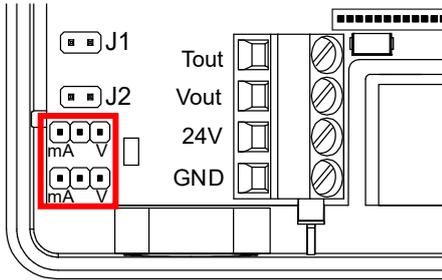

» CONFIGURATION (NO DISPLAY)

Set the jumper output configuration before connecting the supply voltage!

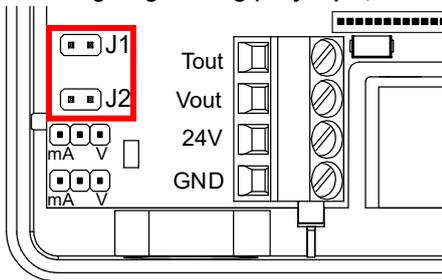

Output settings (via jumper)

Both outputs (temperature and air velocity) can be configured as a voltage (0..10 V) or current output (4-20mA) independently.

Output	Jumper	current (mA)	voltage (V)	current (mA)	voltage (V)
Temperature output	Tout	current (mA)	voltage (V)	current (mA)	voltage (V)
Air velocity output	Vout	current (mA)	voltage (V)	voltage (V)	current (mA)

Measuring range setting (via jumper, no Display type only)

Jumper installed Jumper not installed

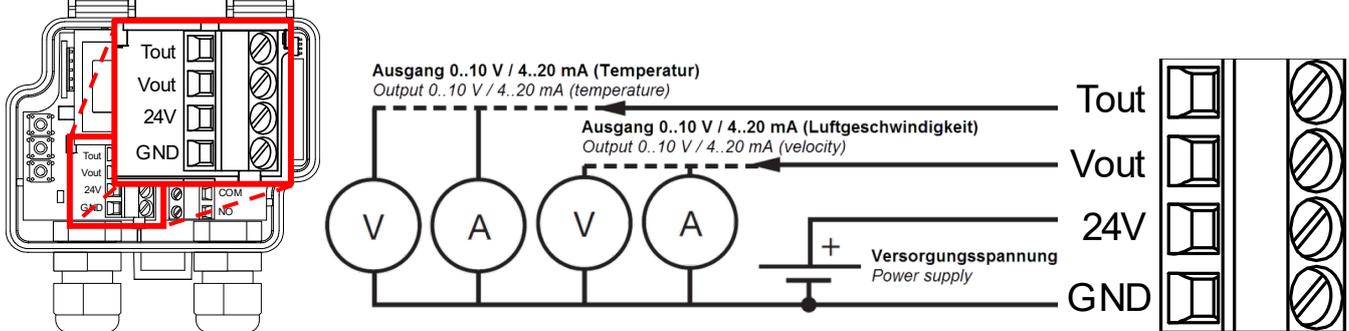

Measuring range	0..2 m/s	0..10 m/s	0..20 m/s
Jumper J1			
Jumper J2			

» TERMINAL CONNECTION PLAN

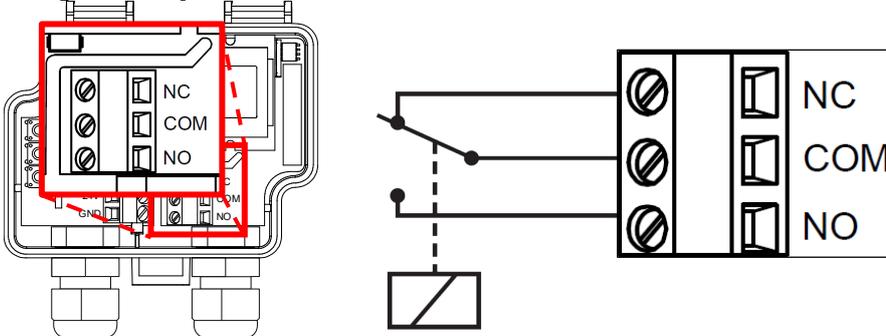

Set the jumper output configuration before connecting the supply voltage!

Wiring of the analog outputs (Tout / Vout)

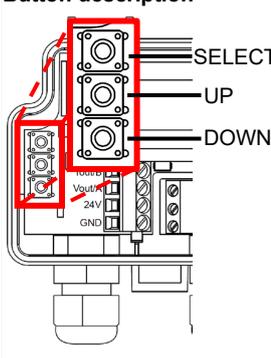

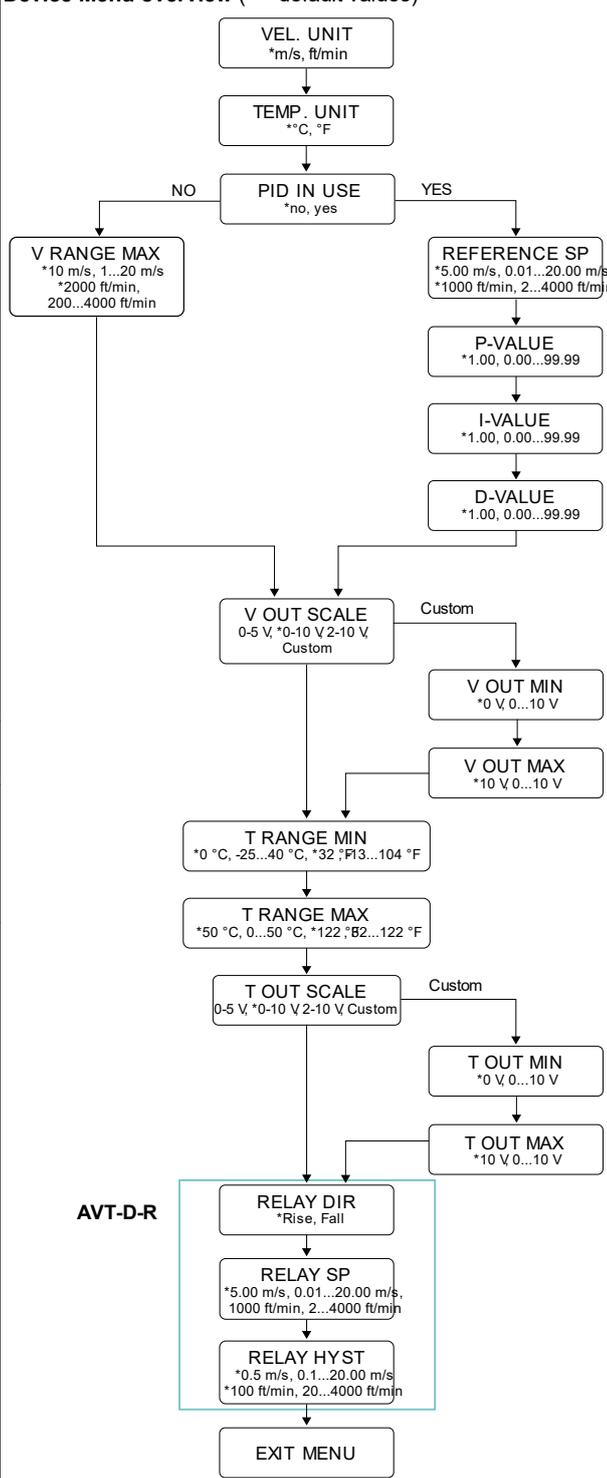

Wiring of the relay

After connecting the relay switch supply, make sure to secure the enclosure with the locking screw to prevent dangerous hazards!

» **MAINTENANCE RECOMMENDATION - CLEANING INSTRUCTIONS**

To ensure the measurement accuracy, clean the device regularly. The cleaning interval depends on the air cleanliness. Fibers, dust or other particles can clog the sensor surface and interfere with the measurement. Long exposure without maintenance can cause false readings.”

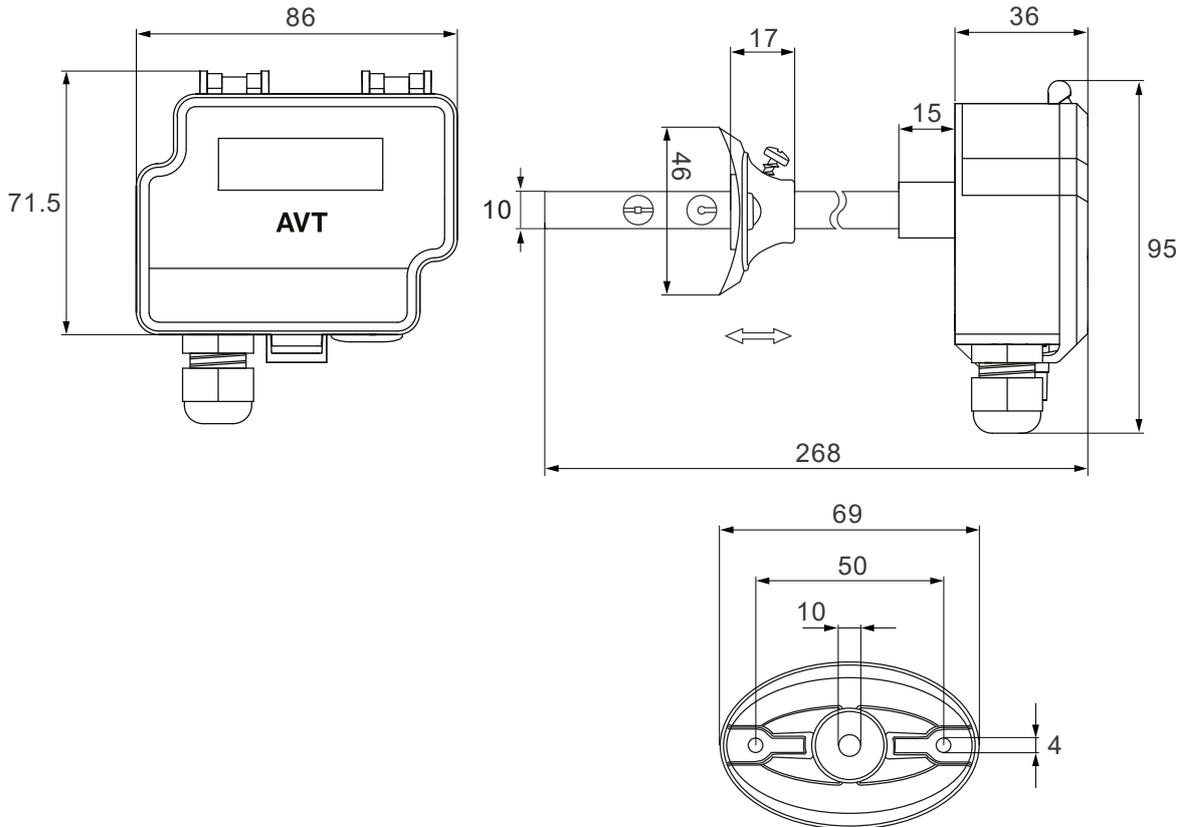

1. Disconnect the device supply voltage. For the -R models, disconnect the device supply voltage and the relay mains supply voltage.
2. Clean the Probe (A) with a soft cloth
3. Clean the Sensor Element (B) with compressed clean air.

Do not use too high pressure, touch the sensor element or use other cleaning methods that cause mechanical stress.

Mechanical stress damages the sensor element and changes the measurement accuracy of the sensors.
